

Dear Parents,

A third individual supported by CSS, who resides in a CSS-owned home tested positive for COVID-19 today. The individual is not showing any concerning symptoms at this time besides the positive test result. The individual is isolated, and his roommate is at home with their family.

All employees who had primary contact with the individual have been contacted, and there are no new reports of anyone showing symptoms to date. Some are self isolating in empty houses CSS has provided them, and some are continuing to work with the individual. All employees working with the individual have been trained and equipped with PPE (Personal Protective Equipment). Additionally CSS is providing masks per CDC updated guidelines to all employees working with individuals.

We will continue to update you on any new positive cases. Our effort is to continue to focus on preventing any secondary exposures as much as possible, and taking the best care of this person we can while keeping staff safe.

Sincerely,
James
